

Colortune Single Plug Kit 14mm

The Colortune plug kit is a simple and effective way to tune petrol/LPG 2 & 4 stroke engines. It is easy to use and works on the principle that the combustion flame burns a particular colour depending on the fuel mix. The Colortune is a spark plug with a glass insulator viewing window so the flame is visible. The colour of the flame inside the cylinder shows the richness of the air/fuel ratio. Yellow indicates a rich mixture, blueish/white a weak mixture and a Bunsen blue flame a balanced mixture. By adjusting the mixture screw to get the correct flame colour the engine can be tuned for optimal fuel economy and performance. The kit also includes a viewscope with adjustable mirror so the flame can be seen when engine access is restricted. Fits most petrol engines in standard form with additional adaptors available for vehicles with alternative sized spark plugs.

Additional Information

- Colortune features a viewing window so the air/fuel ratio can be adjusted according to flame colour. Ideal for simple and effective engine tuning.
- Colortune will fit most vehicles fitted with M14 threaded plugs.
- Kit includes: 14mm short reach plug, hexagonal adaptor, angled cleaning brush & full instructions.
- Extra adaptor sizes available separately, please see Gunson Part Nos. G4055E (18mm), G4055D (14mm long reach), G4055C (14mm tapered seat), G4055B (12mm), G4055A (10mm).
- The complete Colortune kit is also available with the following adaptors G4171 (with 12mm Colortune Plug), G4172 (with 10mm Colortune Plug).
